## Ruffling/leveling machine RM.141

The Limbraco ruffling/leveling machine is equipped with a ruffling axle, a leveling drum and a compression roller. This allows you to ruffle, level and compress in one run only. All drums are separately in height adjustable by servomotors. The motors are frequency controlled and can be operated from both sides of the machine (wireless control is optional). The machine is largely made of stainless steel. High quality components are applied to ensure a long life time. The ruffler is also available with manual height adjustment, and two speed drive motor. Speed of the ruffling axle is mechanically adjustable.

# LIMBRACO

### Machine lift ML.020

This machine is available with or without a cable drum inside. It is suitable to lift machines like a ruffling machine to the required working level.

### Machine lift ML.040

Stainless steel machine lift with 4 legs suitable to lift heavy machines like a harvesting machine (CM.010), or stem removing machine (VR.020).
